RISE with SAP on the Microsoft Cloud

Paving the way to move your SAP workloads to the leading cloud platform for SAP

You want to move your SAP environment to the Microsoft Cloud. This can prove very difficult if you don't have the right solution in place for migration. With several options available to you, how do you decide the right one?

RISE with SAP on the Microsoft Cloud offers one possibility. With this option, customers accelerate their cloud adoption by taking the guesswork and piecemeal licensing out of enterprise planning.

Bundling existing SAP assets using Business Transformation as a Service (BTaaS), RISE with SAP on the Microsoft Cloud brings you to the cloud on your terms by removing hurdles that exist on-premises and SAP ERP customers face. The solutions, tools, and services include the following:

SAP S/4HANA Cloud Suite	**System hosting options**	**SAP Business Network starter pack**
SAP BTP consumption credits	**Business process intelligence**	**Embedded tools and services**

With RISE with SAP on the Microsoft Cloud, SAP manages the Microsoft Cloud for you as well as basic services and SAP Technical Services. Automatic updates ensure you have the latest innovations. You receive a clean migration to SAP on the Microsoft Cloud as well as access to the Microsoft Cloud infrastructure and services.

Let's work together to build a plan aligned with cloud adoption framework.

RISE with SAP on the Microsoft Cloud benefits:

- Understand how your business processes perform
- Identify issues and blockers,
- Reduce costs and accelerate processes
- Improve agility through process harmonization and standardization
